SWISSCAVE

SWISSCAVE WINE COOLERS & HUMIDORS

QUIET. ENERGY-EFFICIENT. RELIABLE.

SUPERIOR TECHNOLOGY

SIMPLE HANDLING

PURIST DESIGN

―

SWISSCAVE is specialized in the production of exclusive wine coolers and cigar humidors which are enjoyed by connoisseurs at home, as well as in high-end gastronomy.

In close cooperation with selected industry experts, SWISSCAVE has perfected the technology of long-term storage and optimal tempering of wine and cigars.

SWISSCAVE wine refrigerators and humidors protect your precious delicacies from damage by external influences. The optimal climate of our wine coolers can easily be monitored and controlled individually in each of the vibration and radiation free cooling zones.

Self-confident, with understated purism, it constitutes a statement in any room – a real SWISSCAVE.

SWISSCAVE COLLECTION

—

PREMIUM EDITION

SWISSCAVE Premium Edition wine cabinets distinguish themselves with their uncompromising simplicity and purism, along with superior specifications like energy efficiency and low noise emission.

Sleek esthetics in conjunction with seamless lines transform a SWISSCAVE into an irresistible premium creation, attracting the gaze of anyone who sees it.

Thanks to the adjustable lighting in white, blue and amber, our wine cabinets fit perfectly into their surroundings whether in hotels, restaurants or bars, or in the comfort of your own kitchen, living room or smoking lounge.

Premium Edition models are fitted with shelves made of beech wood or an alternative natural, untreated sapele or mahogany raw wood - the choice is yours.

Cutting edge frequency-controlled compressors as well as filigree framed glass doors with triple, gas-filled, low-energy glazing, are used in our Premium Edition wine coolers. Consequently, energy consumption is low, along with significantly reduced noise levels.

Temperature fluctuations are beautifully balanced and far superior to the industry average thanks to the intelligent compressor control.

160 SERIES

WLB-160F	
TEMPERATURE ZONES	1 Zone
BOTTLE CAPACITY	47 Bot.
PULL-OUT SHELVES	5 x Beech wood

CLASSIC EDITION

SWISSCAVE Classic Edition wine refrigerators are the perfect symbiosis of practical use, understated yet appealing design and efficiency.

The optimised division, upping storage capacity, makes this all-rounder suitable for storing and tempering of all your wines.

A SWISSCAVE Classic Edition replaces the often praised, and mostly no longer existing, wine cellar, even surpassing it with, among other things, temperature stability. The all-glass front, with the soft blue interior lighting, sets itself apart in restaurants or reception halls.

All units are exclusively tested for longevity. Only high-quality components are used fulfilling SWISSAVE's rigorous quality requirements, be it the ball bearing, dust protected fans or the specially coated cooling units.

KITCHEN EDITION

—

Built-in kitchen appliances from SWISSCAVE are an eye catcher par excellence. By means of a full glass front and an all-round color adjustable illumination, color coordination with the kitchen interior and atmosphere, as well as a free view of the wines, is granted.

The sapele/mahogany pull-outs in natural solid wood do the rest for an exclusive release of the SWISSCAVE Kitchen Edition. The intelligent layout of the shelves ensures that both Bordeaux and Burgundy shaped bottles find their place and are comfortably arranged.

Each cooling zone is fully independent, adjustable from 5-20 degrees Celsius, allowing flexible handling for long and short-term storage and serving, or a combination of both. Use of high-quality components, achieves high energy efficiency and minimum noise emission.

SWISSCAVE built-in kitchen appliances are 60cm wide, 55-57cm deep and fit seamlessly into every kitchen front. Ventilation is provided via hidden air slits in the front or rear panel.

HUMIDORS

—

SWISSCAVE humidors always showcase your cigars at their best. Possessing the most beautiful scent, the cedar wood cradles the cigar boxes or individual cigars, ensuring that they are tempered, aged, and of course, seen. To enhance this experience, the soft amber all-round illumination will display your cigars in the best possible light.

Removable smart racks have been designed to provide the most special presentation. They allow diagonal cigar arrangement in the cabinet, whilst also allowing the presentation and selection of cigars at the table with your guests.

Interior climate of the humidor is of vital importance for your cigars. Not only for the right humidification and temperature control for that most enjoyable smoke, but also and especially, for longer term storage and ageing. The key fundamental is 'comprehensive climate control and monitoring' with beneficial effects that work to stabilise the humidity and temperature, independent of weather or season.
